Pillar 2 — Academy OS

Product: EduOS · **Layer:** 2 · **Sidebar:** Academy

Purpose

Academy OS runs the **core teaching operations** of your center: tutors, batches, auto-generated schedules, students, fees, attendance, and tests. Live classes happen on Zoom/Meet/Teams — EduOS coordinates **when**, **who**, and **what's next**.

Who uses it

Role	Access
Center admin	All Academy modules
Teacher	Own batches, schedule, attendance, students
Student / Parent	Read-only schedule (via their portals)

Modules & functionalities

Module	Path	Key features
Batches	Academy → Batches	Create batches, assign teacher, pick availability slot, topics → auto-schedule
Class Schedule	Academy → Class Schedule	Week calendar, cancel/reschedule, mark done, meeting links
Teachers	Academy → Teachers	Tutor roster, subjects, batch load, reports
Students	Academy → Students	Records, batch assignment, parent contacts, fee overrides
Fees & Invoices	Academy → Fees & Invoices	Monthly billing, generate invoices, reminders, mark paid
Attendance	Academy → Attendance	Present / absent / late, optional parent WhatsApp
Tests & Marks	Academy → Tests & Marks	Record scores, averages, share with parents

How to use — step by step

1. TEACHERS

1. **Academy** → **Teachers** → + **Add Teacher** — name, email, phone, subjects.
2. If you (owner) also teach: use **Settings** → **My teaching profile** instead of a separate login.
3. Set availability in **Tutor Success** → **Schedule** → **Manage slots** (required for slot-based batch scheduling).

2. CREATE A BATCH

1. **Academy** → **Batches** → + **New Batch**.
2. Set name, **Assigned teacher**, capacity, monthly fee, fee due day, subjects.
3. Under **Class schedule from teacher availability**, pick a **free slot** (or manual days/times if no slots).
4. Set course start date and meeting platform (Google Meet / Zoom / Teams).
5. Enter **topics** — one per line (one class per topic).
6. Click ⚡ **Auto-Generate Schedule**, review preview, **Save Batch**.

Rules: Each teacher availability slot can only be assigned to one batch. Booked slots are hidden when creating another batch.

3. ADD STUDENTS

1. **Academy** → **Students** → + **Add Student**.
2. Assign batch; enter parent name and phone (used for fees and comms).
3. Optional: override monthly fee on student record.

4. DAILY SCHEDULE MANAGEMENT

1. **Academy** → **Class Schedule** — Calendar or List view.
2. Filter by batch; click a session.
3. Actions: **Join Meeting**, **Copy Link**, **Reschedule**, **Cancel**, **Mark done**.

5. MARK ATTENDANCE

1. **Academy** → **Attendance** — select batch and date.
2. Toggle each student: Present / Absent / Late.
3. Check **Notify parents via WhatsApp** if desired → **Save Attendance**.

6. RECORD TESTS

1. **Academy** → **Tests & Marks** → + **Record Test**.
2. Enter test name, batch, subject, date, max marks.
3. Enter each student's score → save.
4. Results feed reports and parent notifications.

7. FEES & INVOICES

1. Configure defaults in **Settings** → **Billing & Invoices** (prefix, UPI, due day).
2. Set batch **Monthly fee** on each batch.
3. **Academy** → **Fees & Invoices** → **Generate invoices** for the month.

4. **Send** reminders; **Mark paid** or **Confirm payment** when parent reports UPI transfer.

Verify

- ☐ Teacher has availability slots; batch uses a free slot
 - ☐ Auto-generated schedule shows dated sessions with meeting links
 - ☐ Students enrolled; dashboard shows upcoming classes
 - ☐ Attendance saved and visible in history
 - ☐ Invoices generated with correct amounts
 - ☐ Second batch for same teacher cannot reuse a booked slot
-

Demo tip

Center admin: `admin@brightminds.demo` · **Teacher:** `anita@tutorhub.com` — compare full Academy view vs teacher-scoped schedule.
