Pillar 3 — Communication

Product: EduOS · **Layer:** 3 · **Sidebar:** Communication → Communication Hub

Purpose

The Communication Engine sends **event-driven messages** across WhatsApp, email, SMS, and push. One trigger (absence, test result, class tomorrow) can notify parents on the channels you enable.

In demo mode, messages are **simulated** unless you configure live API credentials.

Who uses it

Role	Access
Center admin	Full Communication Hub
Teacher	Messages tab (own comms)
Parent	Messages in Parent Portal

Modules & functionalities

Path: Communication → Communication Hub

Tab	Function
Dashboard	Message totals, success rate, active automations, recent messages
Automations	Event → channel → template rules (enable/disable)
Templates	Reusable message bodies per event and channel
Channels	Enable email, SMS, push, voice; auto-triggers on attendance/tests/homework
Reminders	Class reminders (24h), homework due, broadcast to all parents
Send	One-off message to phone/email on chosen channel
Event Log	Full message history with channel filter

Top bar: Quick Message jumps to comm hub (when permitted).

WhatsApp credentials: Settings → WhatsApp Business API (Meta token + Phone Number ID). Without these, WhatsApp sends are simulated locally.

How to use — step by step

A. CONFIGURE CHANNELS

1. Open **Communication Hub** → **Channels**.
2. Set **Email from** address; toggle Email, SMS, Push, Voice as needed.
3. Enable auto-triggers:
 - Auto on attendance events
 - Auto on test results
 - Auto on homework due
 - Auto on teacher feedback
1. Click **Save Settings**.

B. MANAGE TEMPLATES

1. **Templates tab** → **+ Template**.
2. Name the template, pick channel and event type, write body text.
3. Use templates in automations for consistent parent messaging.

C. SET UP AUTOMATIONS

1. **Automations tab** → **+ Automation**.
2. Choose event (e.g. student absent, test published).
3. Select channels and linked template.
4. Enable automation — toggle **Active** badge should show green.

D. SEND CLASS & HOMEWORK REMINDERS

1. **Reminders tab** — enable calendar reminders.
2. Click **Send Class Reminders (24h)** before tomorrow's sessions.
3. Click **Send Homework Due Reminders** for assignments due in 24 hours.
4. Use **Broadcast to All Parents** for academy-wide announcements.

E. SEND A ONE-OFF MESSAGE

1. **Send tab** (or WhatsApp section below hub).
2. Enter phone/email, pick channel, type message.
3. **Send** (simulated or live) or **WhatsApp Web** to open manual chat.

F. REVIEW DELIVERY

1. **Event Log** — filter by WhatsApp, email, SMS, or push.
 2. Confirm status and timestamp for each message.
-

Common triggers

Event	Typical message
Absence marked	Parent notified child was absent
Test recorded	Score summary sent to parent
Class cancelled	Reschedule note via WhatsApp
Invoice overdue	Fee reminder with UPI ID
Homework due	Reminder before deadline

Verify

- ☐ Channel settings saved; WhatsApp shows Ready (simulated or live)
- ☐ At least one automation enabled
- ☐ Test send appears in Event Log
- ☐ Attendance save with "Notify parents" creates a log entry
- ☐ Broadcast message reaches message log

Demo tip

Mark attendance with **Notify parents via WhatsApp** checked, then check **Communication Hub → Event Log**.
