Pillar 7 — AI Assistants

Product: EduOS · **Layer:** 7 · **Sidebar:** AI Assistants

Purpose

AI Assistants provide **role-aware help** for owners, tutors, parents, and students: chat Q&A, one-click actions (lesson plans, parent messages, quizzes), and auto insights from your center data.

Works **offline with rule-based AI** by default; add an OpenAI key in Settings for GPT-powered responses.

Who uses it

Role	Typical use
Center admin	Operations chat, insights, owner actions
Teacher	Lesson plans, quizzes, homework ideas
Parent	Explain scores, attendance, how to help at home
Student	Topic explanations and study help

All roles access **AI Assistants** from the sidebar when logged in with appropriate portal.

Modules & functionalities

Path: AI Assistants

Main tabs:

Tab	Function
Chat	Conversational AI with role switcher (Owner / Tutor / Parent / Student)
Actions	One-click generators — lesson plan, parent message, quiz, decisions, dropout risk, study plan
Insights	Auto-generated alerts from attendance, tests, capacity
History	Past conversations — filter by role, clear history

Chat roles:

Role	Assistant name	Example prompts
Academy Owner	AI Academy Manager	"Show me today's problems", "How is attendance?"
Tutor	AI Lesson Assistant	"Generate lesson plan for tomorrow", "Create a quiz on algebra"
Parent	AI Parent Assistant	"Why did my child score lower?", "How can I help at home?"
Student	AI Tutor	"Explain Newton's Laws", "Help with quadratic equations"

Mode badge: Shows **GPT enabled** or **Rule-based** depending on Settings.

How to use — step by step

A. ENABLE GPT (OPTIONAL)

1. **Settings** → **AI Assistant (OpenAI)**.
2. Paste OpenAI API key (sk-...) → **Save Settings**.
3. Return to AI Assistants — badge should show **GPT enabled**.

B. CHAT AS ACADEMY OWNER

1. **AI Assistants** → **Chat tab**.
2. Ensure **Academy Owner** role tab is selected.
3. Click a suggestion chip or type a question → **Send**.
4. Review answer in chat panel; check **Auto Insights** panel on the right.

C. RUN ONE-CLICK ACTIONS

1. **Actions tab**.
2. Select role (Owner, Tutor, Parent, Student).
3. Optionally pick a student and topic.
4. Click **Run** on an action card (e.g. Lesson plan, Parent message, Quiz).
5. Read result in **Action Result** panel below.

D. REFRESH INSIGHTS

1. **Insights tab** (or Auto Insights in Chat).
2. Click **Refresh** after new attendance/test data.
3. Insights surface at-risk students, low attendance, capacity issues.

E. REVIEW HISTORY

1. **History tab** — filter by role.
 2. Review past Q&A for audit or reuse.
 3. **Clear History** when resetting demo data.
-

What AI can and cannot do

Can do	Cannot do
Draft lesson plans and parent messages	Host live video classes
Summarize attendance and test trends	Replace fee collection (see Academy Fees)
Suggest interventions and quizzes	Auto-enroll CRM leads without your action
Explain topics to students	Send WhatsApp without Communication Hub

Verify

- [] Chat responds to owner prompt (rule-based or GPT)
- [] Actions tab generates a lesson plan or quiz result
- [] Insights refresh after data changes
- [] History records the conversation
- [] With OpenAI key saved, mode badge shows GPT enabled

Demo tip

Without API key: ask **"Show insights"** or **"How is attendance?"** — rule-based engine uses live center data.
