

TUITION CENTER OPERATIONS PLATFORM

EduOS

The operating system for education businesses —
acquire students, run operations, keep parents
informed, and grow with confidence.

The problem tuition centers face

Most academies stitch together spreadsheets, WhatsApp groups, and generic LMS tools. Nothing connects leads → classes → parents → business decisions in one place.

✗ Today (fragmented)

- Leads lost in notebooks and chat threads
- Schedules in Excel, links copied manually
- Parents call for attendance and homework updates
- Owners guess instead of deciding from data
- LMS tools want to host your content — not run your business

✓ With EduOS (unified ops)

- CRM pipeline from inquiry to enrolled student
- Auto-generated class schedules with meeting links
- Automated parent updates on WhatsApp & email
- BI that tells you what to do next
- Works with Zoom, Meet, and your existing teaching tools

WHAT EDUOS IS — AND IS NOT

EduOS handles operations

CRM, batches, schedules, attendance, tests, homework tracking, parent communication, tutor performance, and business intelligence.

Your tutors keep teaching their way

EduOS does not replace Zoom, Google Meet, or your curriculum platforms. It coordinates logistics and gives everyone visibility.

9

Integrated layers

5

Role-based portals

1

Platform, many centers

0

Content hosting required

Nine layers. One platform.

Every module a tuition center needs — from first inquiry to parent satisfaction — without bolting on five different products.

1 Education CRM

Public website, lead pipeline, demos, enrollment

2 Academy OS

Batches, schedule, teachers, students, attendance, tests

3 Communication

WhatsApp, email, SMS, event-driven automations

4 Student Success

Learning journey, homework, interventions, certificates

5 Tutor Success

Lesson plans, homework review, performance, PD

6 Parent Experience

Progress, homework, attendance, messages, preferences

7 AI Assistants

Insights, message drafts, role-aware guidance

8 Business Intelligence

KPIs, trends, predictions, daily decisions

9 Extensions & Partners

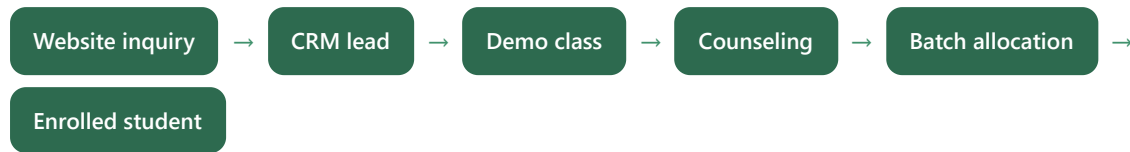

Zoom, calendar, Twilio — connect, don't rebuild

BUILT FOR EVERY STAKEHOLDER

Role	What they get	Key outcome
Center owner	Full dashboard, CRM, BI, all layers	Run and grow the business from one screen
Teacher	Today's classes, attendance, homework, students	Focus on teaching, not admin chaos
Parent	Child progress, homework, messages	Trust and transparency without phone calls
Student	Schedule, homework status	Clear expectations, fewer surprises
Platform operator	All centers, onboarding, support view	Scale EduOS as a multi-center product

How centers use EduOS daily

WORKFLOW 1 — FROM STRANGER TO ENROLLED STUDENT

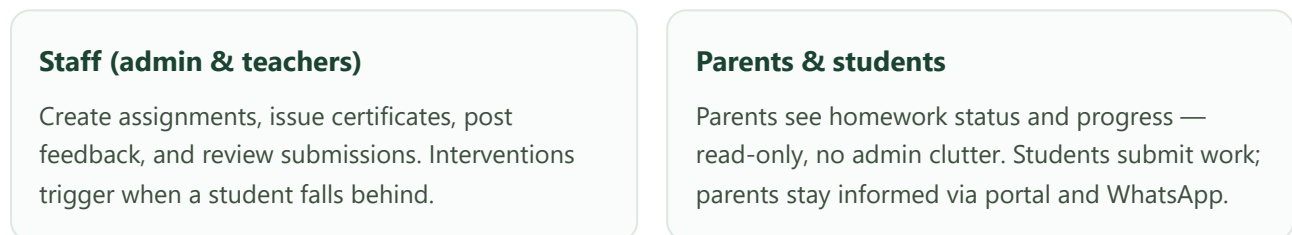

Capture leads from your public site, WhatsApp, walk-ins, and ads. Move them through a visual pipeline with follow-up reminders — then enroll in one click.

WORKFLOW 2 — RUNNING CLASSES EVERY WEEK

Pick days and times, add topics, and EduOS generates the full term schedule with Google Meet, Zoom, or Teams links. Teachers mark attendance; parents get updates automatically.

WORKFLOW 3 — HOMEWORK & PARENT VISIBILITY

WORKFLOW 4 — OWNER DECISIONS, NOT JUST REPORTS

Business Intelligence goes beyond charts. EduOS surfaces **today's decisions**: which leads need follow-up, which students are at risk, which batches need attention — with one-click actions.

Multi-center ready

EduOS is built for operators who onboard many tuition centers on one platform — each with isolated data, their own admin, teachers, and families.

For franchise & SaaS operators

Platform dashboard shows all centers. Support view lets your team help a center without sharing passwords. Suspend, monitor, and onboard new centers in minutes.

For independent academies

Register your center and get a full workspace immediately — CRM, batches, comms, and parent portal included. No IT team required to start.

WHY CENTERS CHOOSE EDUOS OVER GENERIC TOOLS

Capability	Spreadsheets + WhatsApp	Generic LMS	EduOS
Lead-to-enrollment CRM	Manual	Rarely	✓ Built-in
Auto class scheduling	Manual	Partial	✓ Topic-based
Parent WhatsApp automations	Manual	No	✓ Event-driven
Teacher workspace	No	Content-focused	✓ Ops-focused
Owner decision engine	No	Reports only	✓ Action cards
Multi-center platform	No	No	✓ Native

See EduOS in action

Live demo available — walk through every role in one session:

- Center owner: CRM → batch → schedule → BI decisions
- Teacher: today's classes, attendance, homework
- Parent: progress portal and automated updates
- Platform operator: multi-center dashboard
